Claims 72-75 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Nowhere in the specification do applicants disclose how to chemically bond the immunogen to the particulate carrier. Applicants provide no examples nor do they provide any direction, the breadth of the claims is broad and the level of predictability in the art is low, given the variety of compounds that can elicit an immune response. Thus, the level of skill is necessarily high as is the quantity of experimentation.

Claims 72-75 are rejected. Claims 71, 76-85 are allowed.
